SUMMARY

Information Technology student at the University of Mindanao (2021-2026) with hands-on experience building mobile, web, and desktop applications. Proficient in C#, Dart, Python, Java, JavaScript, and PHP, with expertise in Flutter, Laravel, and ASP.NET frameworks. Experienced in Firebase/BaaS integration, Cloud Firestore, and MySQL database management. Certified Information Technology Specialist in Cybersecurity, Network Security, and HTML & CSS. A driven problem-solver and team player eager to contribute to real-world software development projects.

PROJECTS / EXPERIENCE

WORKINGITOUT - WORKOUT APP

Mobile Application

2025-2026

A gamified mobile fitness app targeting young adults that combines honesty-based self-reporting, personalized workout recommendations, and a reward system to promote consistent and healthy exercise habits.

- Developed using Flutter and Firebase, implementing real-time workout tracking, user authentication, and cloud-based data storage.
- Designed an honesty-based workout completion system where users self-report results, reinforced by a structured reward and badge system to encourage accountability.
- Integrated a content-based filtering algorithm to deliver personalized workout recommendations tailored to individual fitness levels and goals.
- Collaborated in a team environment handling feature development, UI design, and system integration across the full app lifecycle.

IMAGINARIESHOP - ECOMMERCE WEBSITE

Web Application

2024

A full-stack e-commerce platform where users can browse categorized products, manage shopping carts, and securely complete transactions through multiple payment methods.

- Built using ASP.NET and MySQL.
- Implemented user accounts, product management, and order tracking features.
- Integrated PayPal payment gateway for secure and convenient checkout.
- Worked with a team, managing backend logic, database structure, and deployment.

INFINITY HUB - MANPRO - HRMS

Internship/Web Application

2026

A full-stack Human Resource Management System for managing employees across their lifecycle, where I focused on the Performance Management module enabling organizations to run structured evaluations, track performance metrics, and generate appraisal results.

- Built using Laravel (PHP) and MySQL on the backend, with a React and Material UI frontend.
- Developed configurable evaluation forms and performance metric (KPI) tracking with multi-reviewer workflows, categorization, and secure file attachments.
- Created an appraisal system with review periods, scoring logic, audit logging, and exportable reports, while collaborating within a team on backend logic, database structure, and API integration.
